515 SERIES

SilcoNert[™] 1020 Switchover

The 515 Series SilcoNert 1020 is an automatic switchover system designed to deliver a continuous supply of reactive, corrosive, or high purity gases for calibration, instrument support, or process, control. The proprietary amorphous Silicon surface finish provides extreme inertness and corrosion resistance over 316L stainless steel. To maintain constant downstream pressure, an integral line regulator option is available.

Typical Applications

Reactive calibration standard

Emissons monitoring

H₂S and reduced sulfur calibration standards

Mercury calibration standards

Low lever sulfur in hydrocarbon gas control

Corrosive gases

Ultra high purity instrument pure gases
