

840-9006 Heavy Cutter Outfit Shown

Heavy Cutter

The Heavy Cutter kits provide quality equipment for cutting steel up to 12" thick. It is primarily for contractors in steel erection or fabrication, scrap dealers, and for demolition contractors. It is also ideal for riggers, millwrights, rescue squads and police and fire departments. The outfit includes the rugged premium quality 822-9516 torch with triangular tube arrangement or the 822-9086 for those who prefer the in-line tube configuration. Both torches feature stainless steel heads and tubes, and sure-grip handles. The torches are positive pressure tip mixing type which provide a wide range of preheat intensity with any popular fuel. The outfit includes CONCOA's 9600 Series extra heavy-duty single-stage cylinder regulators. The **NEW 9700 Outfits** are equipped with CONCOA's 9700 Series Cutting Torch. It has a brass head and nickel alloy triangular tubes for strength and durability. The Outfit also has the **6500 Series Capsule® regulator with CONCOA's exclusive 5-year warranty.**
